

Linear Relationships - Day 3
Assignment

Name _____

Date _____ Period _____

equation	Solve for y	table	graph	increasing or decreasing?	intercepts												
1. $-3x + y = 4$		<table border="1"> <thead> <tr> <th>x</th> <th>y</th> </tr> </thead> <tbody> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> </tbody> </table>	x	y													x-intercept (,) y-intercept (,)
x	y																
2. $2x - y = -1$		<table border="1"> <thead> <tr> <th>x</th> <th>y</th> </tr> </thead> <tbody> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> </tbody> </table>	x	y													x-intercept (,) y-intercept (,)
x	y																
3. $x - y = 3$		<table border="1"> <thead> <tr> <th>x</th> <th>y</th> </tr> </thead> <tbody> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> </tbody> </table>	x	y													x-intercept (,) y-intercept (,)
x	y																
4. $y = -2$		<table border="1"> <thead> <tr> <th>x</th> <th>y</th> </tr> </thead> <tbody> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> </tbody> </table>	x	y													x-intercept (,) y-intercept (,)
x	y																

equation	Solve for y	table	graph	increasing or decreasing?	intercepts										
5. $y = 4$		<table border="1"> <tr><td>x</td><td>y</td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> </table>	x	y											<p>x-intercept (,)</p> <p>y-intercept (,)</p>
x	y														
6. $3x - 2y = 4$		<table border="1"> <tr><td>x</td><td>y</td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> </table>	x	y											<p>x-intercept (,)</p> <p>y-intercept (,)</p>
x	y														
7. $x - y = 3$		<table border="1"> <tr><td>x</td><td>y</td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> </table>	x	y											<p>x-intercept (,)</p> <p>y-intercept (,)</p>
x	y														
8. $x + y = 0$		<table border="1"> <tr><td>x</td><td>y</td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> <tr><td></td><td></td></tr> </table>	x	y											<p>x-intercept (,)</p> <p>y-intercept (,)</p>
x	y
